

Silicone Implants

NEW STERILE FACIAL IMPLANTS

Hanson Medical has recently designed and manufactured a new line of formerly patented facial implants featuring superb balance and symmetry. These implants, similar to some you may already be using, are offered at a 25% to 40% savings over our competitors. They are provided sterile with free sizer sets offered complimentary with your initial order of each style. For your custom implant needs, we offer free moulage modeling kits and will send you a model of your design for approval prior to manufacturing.

ABOUT US

Hanson Medical's principal staff members have been serving the Plastic and Reconstructive Surgery Industry for over 25 years. Over the years we have worked with many of the masters to design, manufacture, and market quality facial and body contouring silicone elastomer implants. Our High Quality Manufacturing Operation, located in Paso Robles, California, is certified by the International Standards Organization. We are compliant with the FDA Code of Federal Regulations for Good Manufacturing Practices. We have passed every inspection by the FDA and the California Food and Drug Branch in excellent fashion. Our implant grade raw materials are manufactured by Nusil Corporation of Carpinteria California. We offer world class implants and friendly efficient customer service.

BIOCOMPATIBILITY STUDIES

Hanson Medical has performed a vast battery of biocompatibility studies on our finished implants. These studies include Cytotoxicity, Mutagenicity, Pyrogenicity, Chromosomal DNA Aberration Testing, Muscle Implantation Studies, Teratogenicity and others.

SYMMETRIC IMPLANTS

Recent research has discovered that the main key to facial attractiveness is symmetry. The female models shown all have been gifted with facial symmetry. We have made a concentrated effort to create implants with near perfect symmetry in order to create a beautifully balanced surgical outcome for your patients. Our implants may also be scalpel adjusted by the surgeon for the patient lacking ideal facial symmetry.

CUSTOM IMPLANTS

Hanson Medical offers rapid custom implant fabrication with an average turn time of one week. We will send you a model of your implant upon request for your final adjustment and approval. Custom implant design kits are complimentary with your custom implant purchase.

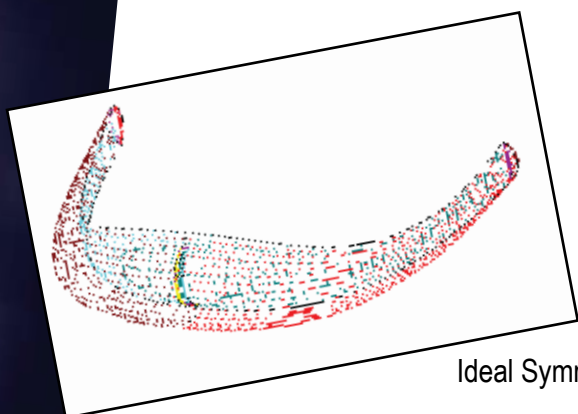

STERILE IMPLANTS

Our entire line of silicone elastomer facial implants are provided sterile. We are the first company to have validated a hydrogen peroxide gas sterilization process. Our unique processes have eliminated concerns with gamma radiation and ethylene oxide.

APPRECIATION

We thank you for reviewing this brochure and for considering Hanson Medical as your new partner in Plastic Surgery.

Thank you for operating with us.

Hanson Medical offers the largest selection of nasal implant styles and sizes in the market. They are available in flesh tone or white. Most implants are easily modified with a scalpel. The columellar strut is almost always trimmed down, if not eliminated completely. Patient selection is critical. The patient should have adequate dermal and subcutaneous skin layers to cover the implant. Free sizers are available for each style of implant ordered.

We offer the Bircoll and Aiache designs in calf implants. It is recommended that surgeons be conservative with the degree of augmentation and exercise caution concerning patient selection to avoid complications such as compartmental syndrome. Our Pectoral implants vary in projection widely and again we recommend a conservative approach in matching the size of the implant to the patient. The Style 2 pectoralis may be placed vertically or reversed and placed horizontally on the contralateral side. Therefore a right side can be used on the left side. One free sizer is available for each implant purchased.

Hanson Medical is dedicated to providing you with High Quality Implants and outstanding customer service. Our customers are our first priority and we strive to accommodate your busy schedules. Most implants are in stock and ready to ship the same day.

All facial implants are provided STERILE.

All implant materials are FDA master filed solid silicone elastomer approved for long term implantation.

All implant dimensions are in centimeters and accurate to 1mm and approximately 30 durometer.

Sizer sets are available.

Custom Implants can be manufactured from a "Moulage Model" or by detailed drawings. Turn-around time is usually 7-10 days.

Moulage kits are available for Custom Implant sculpting.
